

**REMARKS**

The specification has been amended to correct inadvertent errors. It is submitted that no new matter has been added. On page 8, beginning at line 31, the phrase "less than" before "40" has been added and is consistent with the remainder of the sentence which also describes PAT polymers as having less than 40 mole % modification. On page 9, line 15, the amount of diacid is at least 60 mole % based on the moles of all carboxylic acids, consistent with the approach taken with respect to diols. On page 35, line 34, the phrase "at least" has been inserted before a temperature of 140° C to be consistent with the remainder of the specification which refers to drawing at a temperature of at least 140° C or more, such as at page 36, line 25 and page 37, line 7.
